## Security

- Security in the port is maintained round the clock by specially trained port security personnel who are armed as and when required. In addition to security personnel; Bangladesh Ansar are also deployed for strengthening port security.
- Personnel access control is maintained with Proximity Access Control System, Archway, Hand Metal Detector, baggage scanner etc.
- Vehicle search is carried out with Fixed Under Vehicle Inspection System. Beside this, Hydraulic Road locker is installed at one gate for stopping entry/exit of vehicle on any emergency.
- Trained watchmen are deployed onboard ships to ensure security of ships staying in port area.
- The activity in the port restricted area continuously monitored through Close Circuit Television (CCTV). There is also auto generated fire alarm system including port fire service. Port also includes a public address system to announce a general broadcast/emergency message for people working inside the port.
- River area patrol is carried out with speed boats.
- The future procurement includes- extension of existing CCTV and public address system, Search and Rescue Cum Ambulance Ship, Fire Fighting cum Rescue Vehicle, Mobile X-ray Screening System, Explosive detector, One -way Machine Readable Access Control System for vehicle and personnel, Mobile explosive Detector, Heavy recovery Vehicle, Modern Fire Fighting Vehicle/Snorkel etc.
- The Mobile Explosive Detector shall be Capable to detect any explosive , narcotic, stowaway etc. Recovery Vehicle shall recover any damaged/illegally parked/sized vehicle and new Fire Fighting cum Rescue Vehicle shall be capable to fight fire at higher levels of multistoried buildings. Search and Rescue Cum Ambulance ship shall be Capable to rescue distressed personnel within the port limit and provide necessary medical treatment.
- CPA is ensuring compliance of international Ship and Port Facility Security Code since 2004 to render service to ship in a manner with international standard.
