Vessel Traffic Management Information System (VTMIS)

Chittagong Port and its anchorage areas are covered by modern VTMIS to ensure maritime safety and safety of navigation in the contained waters of river Karnafully. It is a radar and camera based vessel Traffic Management and information system. The introduction of the system will not only enhance maritime safety but will also reduce the threat of piracy and theft in the anchorage areas. Guiding the pilots in the hours of restricted visibility and navigation during fog could be possible when the system is fully operational. It is a modern tool in the hands of the mariners.
